

Rainbow Falls is named for rainbows the rushing waters often give rise to in a quarter-mile cascade over a series of ledges dropping 10-20 feet in service as rocky steps for the water's journey down from Whitesand Lake to the Whitesand River in Rainbow Falls Provincial Park east of Rosport, Thunder Bay county, Ontario. This photograph, taken not when Rainbow Falls essence was made but rather in a subsequent, near-drought Summer, reveals the sharp, granite bedrock lining the floor and sides of the Falls and giving plants no foothold. Expand in your imagination the white, rushing water to double or triple this volume to sense more fully Rainbow Falls' powerful essence at the time I ventured into the Falls to hold the vessel accepting that gift.

Rainbow Falls

helps to release one's fear & anxiety around challenging situations.....
gives one the courage & faith to transcend the "impossible"

An essence to use when we are challenged to move quickly
to integrate multiple levels of energy together.....
moving with enthusiasm, strength, and fluidity.....
balancing force and power with integrity and action.....

Supporting quick and clear decision making
that manifests powerfully and intentionally in our own lives and in the world.....

While enhancing ability to focus the swift charged moving forces of change and
challenge with accuracy and abundant energy.....

Enabling one to clearly plunge into the turbulent depths of any situation
with a clear and ever-present sense of protection, divine guidance, and support.
Helpful when any resistance to life force,
to total and complete emersion into the life waters of creation,
any distraction or doubt
or lack of ability to move with these strong forces of the elements
with timing, precision, and balance
may cause us to slip.....
losing our connection.....
making the future more challenging or even fatal.....

Rainbow Falls essence supplies effervescent, playful, and passionate energy
to move through any resistance to challenge
with dramatic speed and clarity.....
