

# Trillium

protection from physical or psychic attack

Opening the doors of inner consciousness

can place our physical body in an unprotected state.

The Trillium flower essence serves those sensitives  
who find themselves vulnerable to attack.

These attacks may be experienced physically, emotionally, or mentally.

The clue is that the attacks seem to come on violently fast,  
seemingly out of nowhere,  
and they are rarely the result of cause and effect,  
as they are rarely deserved.

The attacks can be seen as dark energy

specifically targeted at those on missions of healing and love.

The trouble is that the more you open yourself up and devote yourself to service,  
the more you may find yourself derailed by random and confusing attacks.

Spiritual psychic energy can be hard to understand.

Observing subtle movement of dust particles

floating on a draft of air through a sunny bedroom window,  
one can begin to understand the movement of the invisible.

Every motion of thought or wave, prayer or risk

causes reaction or communication all around it.

The Trillium flower speaks with the power of three's.....

3 petals supported by 3 large leaves with 3 larger leaves below.

Working with three's

one can form the triangle ~ the strongest of all geometric forms ~  
the ancient pyramid, the modern geodesic dome.

3..... the Holy Trinity

3..... the Sun the Moon the Earth

3..... man woman child

In holy union the third is created.

Life procreation strength.

The Trillium flower essence brings the strength of three  
as a protective shield to deflect psychic attack  
while it works to create more psychic clarity  
within this framework of three.

As vulnerability is replaced by stability  
a radical ability to move forward  
and accomplish altruistic missions unchallenged  
is accomplished.
