

Miracles are possible

Miracles surround us in every direction.

Know this. Feel this. Begin your life!

The Miracles combination essence contains five "Miracle Flowers" from my garden, flowers that transcend the template.

First, Pansy, a Spring bloomer flowering in my Michigan garden on January 6th, Three Kings Day, after continuing to bud and blossom through December snows with temperatures dipping to 15 degrees (Fahrenheit).

Then, Strawberry blossoms in late September on Spring-flowering strawberry plants - a radiant white among the bright shades of Fall leaves.

Third, first-time Blackberry blossoms on a thornless blackberry plant, a hardy, stout vine that had never flowered during its 25 years. And that vine bore fruit from the blossoms!

Next, Crab apple blossoms and green leaves in September alongside the ripe fruit born from the blooms of the previous Spring.

And last, Cherry blossoms and new green leaves in the Fall—four Falls in a row!—on a "dead" cherry tree that had bloomed each Spring for 20 years. Those Fall blossoms were abundant, staying on the tree for a month and a half, far longer than any of the Spring blooms of the tree.

Miracles are the new paradigm.

Release your fears and expect a Miracle!
